

State Route 99 Tagus-Goshen Rehabilitation Tulare County

Project Purpose:

The purpose of this project is to improve service and extend the life of the facility while enhancing safety and operations. Motorists will benefit from safety improvements and the movement of services and goods will greatly improve through highway continuity improvements.

Project Description:

On State Route 99 in Tulare County from north of Tagus Avenue Overcrossing to north of the Goshen Overcrossing. The project will rehabilitate the existing northbound and southbound roadways by repairing localized areas of failure, seal cracks, overlay the repaired pavement with asphalt and widen a majority of the non-standard shoulders to current standards. The proposed project would also rehabilitate the existing roadway with a asphalt overlay. Rehabilitation of existing ramps also assumes an asphalt overlay. Non-standard dikes will be replaced, and the ground will be graded flush with the shoulders to eliminate drop-off where there are no dikes.

Construction Cost: \$15 Million

Begin Construction: July 2007

End Construction: October 2008

Funding Sources: State Highway Operation and Protection Program (SHOPP)-Roadway Rehabilitation Program
